WELCOME TO

Diamond Rice Mills

Pure Basmati Rice, from the Heart of Punjab

Sourced purely from Punjab's region
for authentic Basmati quality.

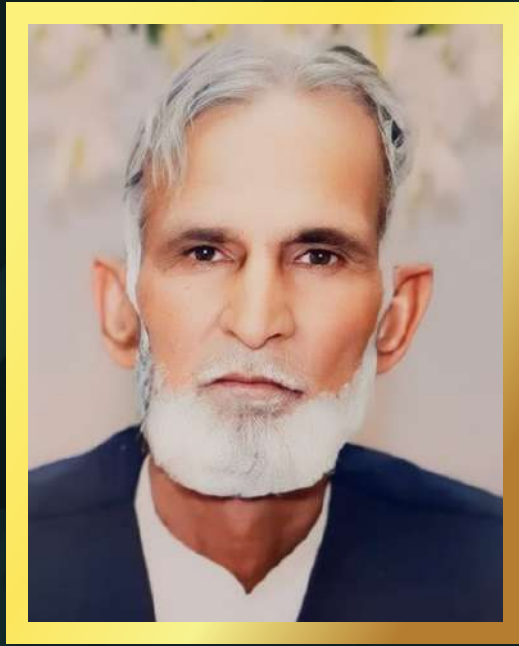

43+

Years of

Unmatched Excellence

At DRM | Diamond Rice Mills, we believe that the future of global food excellence is built in the present. We are driven by a clear vision: to emerge as a trusted specialty food company through sustainable practices, transparent operations, and an unwavering commitment to premium quality rice. Every grain we deal reflects our dedication to nourishing communities, supporting health-conscious consumers, and delivering tailored packaging solutions for bulk rice orders.

FOUNDER MESSAGE

Our Chairman, with over **43+ years** of unmatched excellence in the global foodstuff industry, has been the visionary force behind Diamond Rice Mills' rapid ascent and sustained success. His deep expertise, strategic creativity, and adaptable leadership have directly propelled DRM to achieve significant milestones, establishing us as a large and trusted distributor of rice. He upholds a steadfast commitment to product excellence, action-oriented strategies, and customer-centric practices—principles that continue to guide our innovation and growth.

– Muhammad Inayat - Founder & Chairman

We are proud to blend tradition with innovation, offering you rice that is not only premium in quality but also responsible in its making.

Goals

To become a leader in premium rice production by consistently exceeding international quality standards. We aim to innovate sustainable processes and expand market reach while delivering superior value to our customers.

Mission

To provide the customers with premium, nutritious rice through advanced processing, unwavering quality control, and sustainable practices. We are dedicated to enriching lives by delivering excellence from our fields to families globally.

Vision

To be the most trusted and innovative rice trader on international level, recognized for exceptional quality, sustainability, and customer satisfaction. We envision a future where our rice sets the global standard for purity, taste, and reliability.

Values

Upholding the highest standards in every grain, process, and partnership. Pioneering advanced, eco-friendly practices that ensure quality today and protect resources for tomorrow.

We provide the perfect & fine textured RICE for you.

Diamond Rice Mills, based in Dist Hafizabad, Punjab, Pakistan, is committed to bringing finest quality rice. Strategically located in Punjab, our company is led by a team of professionals dedicated to excellence at every step. Values:

Upholding the highest standards in every grain, process, and partnership. Pioneering advanced, eco-friendly practices that ensure quality today and protect resources for tomorrow.

— **Fiaz Ahmad** — Manager Operations

Empowering Lives Through Sustainable Excellence

“Aiming for perfection in rice milling and processing, our export company is dedicated to providing complete customer satisfaction.”

Infrastructure

We operate modern, hygienic warehouses ensuring optimal preservation and offer bulk exports of premium Basmati and Non-Basmati rice. Our advanced facilities also enable tailored packaging solutions in various sizes and materials to meet specific client needs.

Quality Assurance

As leading Basmati Rice supplier, we guarantee premium quality through rigorous, multi-stage inspections from paddy to packaging. Our stringent international hygiene standards and commitment to excellence ensure a reliable supply of meticulously processed rice.

Auto Drying Process

DRM's advanced 10-metric-ton-per-hour drying plant features a precise two-stage process using innovative smoke-free hot air technology. This meticulous method preserves the rice's quality and integrity, ensuring it meets the highest standards from start to finish.

Husking Plant

Following drying, our paddy is meticulously cleaned, de-husked, and graded to produce nutrient-rich Brown Rice. This process preserves the germ and bran, retaining essential vitamins, minerals, and dietary fiber to meet the demand for health-conscious foods.

Warehousing

At DRM, we develop Basmati Rice's signature aroma and flavor through meticulous 8-9 month aging. Our premium rice is stored in a state-of-the-art, well-ventilated warehouse under stringent hygiene and continuous monitoring to ensure only the highest quality reaches our global clients.

Grading

Our precise grading process utilizes Buhler Drum Graders and Plan Sifters to meticulously separate and eliminate broken or withered grains. This ensures DRM delivers consistently premium rice, meeting the highest standards of excellence for our clients worldwide.

Comprehensive and advanced

Milling & Storage Capacity

Comprehensive and advanced processing plants ensure the transformation of paddy into premium-quality rice through a series of stages.

Processing units with a capacity of 20 Metric Tons per hour. 2 Husking Units with a capacity of 5 Metric Tons per hour.

Standardized Warehouses with a capacity of 20,000 Metric Tons.

Paddy Dryers with a capacity of 60 Metric Tons per hour.

Latest Rice Steaming Plant with a capacity of 15 Metric Tons per hour.

Technologically advanced Parboiled Rice Plant with a capacity of 10 Metric Tons per hour.

Our storage capacity of 25,000 Bags.

Advanced State-of-the-art

Rice Processing Plants

Integrate innovation at every stage—from drying and husking to precision whitening, grading, and packaging. Driven by an unwavering commitment to excellence, this end-to-end control guarantees a superior quality of rice that consistently meets the highest standards of global markets.

Eco-Friendly

Solar-Powered Process

Our dedication to excellence goes beyond delivering premium rice. We are committed to a sustainable future, integrating Eco-friendly practices into every stage of our operation. Central to this mission is our investment in solar energy, powering our facilities with clean, renewable resources to reduce our environmental footprint while ensuring uncompromising quality.

Paddy Procurement

Field Drying

Diamond Rice Mills proudly houses Pakistan's premier procurement teams. Our expert selectors meticulously source the finest paddy from top districts, employing rigorous on-site moisture, purity, and quality tests. Every batch is then validated by our Quality Assurance team to guarantee full compliance with international standards.

Auto Moisture Removal

Drying Processing Plant

Our Auto Drying Processing Plant ensures optimal moisture removal in three precise stages. First, a pre-dryer significantly lowers moisture content, followed by a column drier for further reduction. The final stage utilizes steam heat exchangers to deliver clean, smoke-free hot air for a perfectly dried product.

State-of-the-art

Husking Plant

Our state-of-the-art Husking Plant transforms cleaned paddy into premium brown and white rice. We specialize in nutrient-rich brown rice, where only the inedible husk is removed to preserve the nutritious germ and bran layer. Following this, precise de-husking and grading processes produce the refined white rice that meets our stringent quality standards.

Grain Proceeds to Processing

Modern Pre-cleaning Unit

Our Modern Pre-cleaning Unit is engineered for ultimate purity. State-of-the-art pre-cleaners and classifiers meticulously filter out all impurities—from straw and mud to stones and metal particles. This precision-first step ensures only the finest, contaminant-free grain proceeds to processing.

Quality Assurance

Whitening (Rice Polishing)

Our advanced whitening process utilizes state-of-the-art polishing machines to efficiently remove the bran layer, ensuring the highest quality white rice. This meticulous method produces DRM Basmati, a premium rice milled specifically to deliver an unmatched aroma and perfect cooking experience.

Ultra-modern-scanner

Color Sorting

To guarantee a premium, uniform appearance, our rice undergoes a final, high-precision color sorting stage. We utilize a dual-technology system: first, Japan's exacting SATAKE Color Scan-master, followed by the ultra-modern BUHLER SORTEX S UltraVision optical sorter from the UK.

International Standard

Rice Grading

We ensure premium quality through precise Rice Grading, where every kernel is meticulously sorted by size, shape, and density to guarantee uniformity. This critical process follows our advanced whitening stage, ensuring that Diamond Basmati rice meets strict international standards.

Advanced & Automated

Packaging of Rice

Diamond Rice Mills utilizes a technologically advanced, automated packaging line for precise weighing and bagging of our premium rice. We offer versatile, practical SKUs, including HDPE, Paper Sacks, Non-Woven, Cotton, PP, Jute Bags, Cardboard Boxes, Plastic Jars, and Master Cartons.

Trusted Logistics Providers

Rice Shipment

We provide a complete end-to-end service, from creating your custom private label brand—including multi-language packaging—to secure global shipment. Diamond Rice Mills partners with trusted logistics providers and all major shipping lines to ensure your consignment is delivered safely and on time.

Hygiene Standards

Quality Assurance

To guarantee a premium, uniform appearance, our rice undergoes a final, high-precision color sorting stage. We utilize a dual-technology system: first, Japan's exacting SATAKE Color Scan-master, followed by the ultra-modern BUHLER SORTEX S UltraVision optical sorter from the UK.
